IBM i Application Languages Strategy

- RPG is the most commonly used language on IBM i so
 - Enable RPG as a powerful, modern procedural language
 - Partner for tools which transform older RPG to modern RPG
 - Work with partners & schools to teach RPG to non-RPG developers quickly

- Extensive skills and catalogs of solutions exist for business in other languages
 - Support key industry languages and programming models on IBM i
 - Ensure those new approaches can integrate with existing IBM i solutions
 - Enable tools for development, debug, lifecycle – from IBM and from partners

Letter of Commitment for RPG

April 12, 2016

Dear IBM i clients and partners,

I would like to take this opportunity to reaffirm the commitment that IBM has made with regard to RPG, COBOL and the IBM i Development suite of tools. Recently, the team responsible for developing the compilers and tools for IBM i have moved into the [IBM i] Development organization. This will allow more synergy between the development of the languages and the development of the operating system.

As indicated by Doug Systems is committed the ILE RPG and ILE commitment has had Free Format RPG, SQL and technologies an enhancements support parallel with our mo languages were also

We gather requirements for these Application Development environments for IBM i, from a number of customer advisory councils and we balance those requirements with our study of industry trends. As the delivery of updates to the compilers and Rational Developer for i unfolds over the next several quarters you will see further evidence of our eagerness to listen, to collaborate, and to deliver the improvements you consider most valuable.

IBM Power is committed to your success – to helping you realize business value from your applications and to extend that value with new business opportunities. We thank you for your business and your confidence in the future of one of the world's most durable and productive platforms for business.

Sincerely,

Steve Sibley
Vice President, Business Line Executive
IBM Power Systems

As indicated in the IBM i Strategy Whitepaper, IBM Power Systems is committed to the success and ongoing development of IBM i. This includes the ILE RPG and ILE COBOL compilers and associated development tools.

Why a Tool for Analysis?

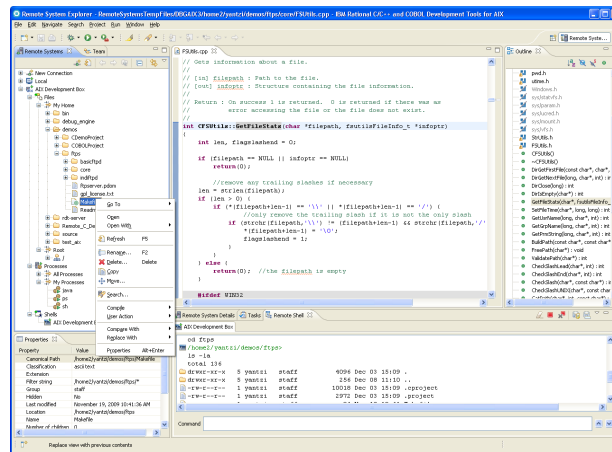

- Rapid analysis for hot fixes
- Application Change Studies (cost estimation)
- Redesign/re-architecting/SOA
- Extraction of business rules
- Application modernization
- Skill transfer
 - Help new people learn the application
- Generation of documentation required by regulatory constraints

© 2018 IBM Corporation

Rational Developer for i

- Modern
- Integrated
- Analysis
- Debugger
- Visual
- Supports RPG, COBOL, CL, C, C++, SQL, DDM

What's new in RDi 9.6

- Compiler & program verifier messages – annotated
- Unused variables - annotated
- Rich ILE RPG hover showing all contributing definitions
- Shift/split free form ILE RPG using the Tab/Enter
- Compare/Merge of members with sequence numbers
- i Project improvements
- Upgrades: Eclipse 4.6.3, RAD 9.6.1, WAS 9, ACS 1.1.7.1, JTOpen 9.3
- Over 40 fixes and 7 RFEs
- Headless Code Coverage
- Refactor Rename improvements

Developer Productivity

- Return on Investment
- Better able to respond to the needs of the business
- Higher quality
- Positioned to adopt new talent

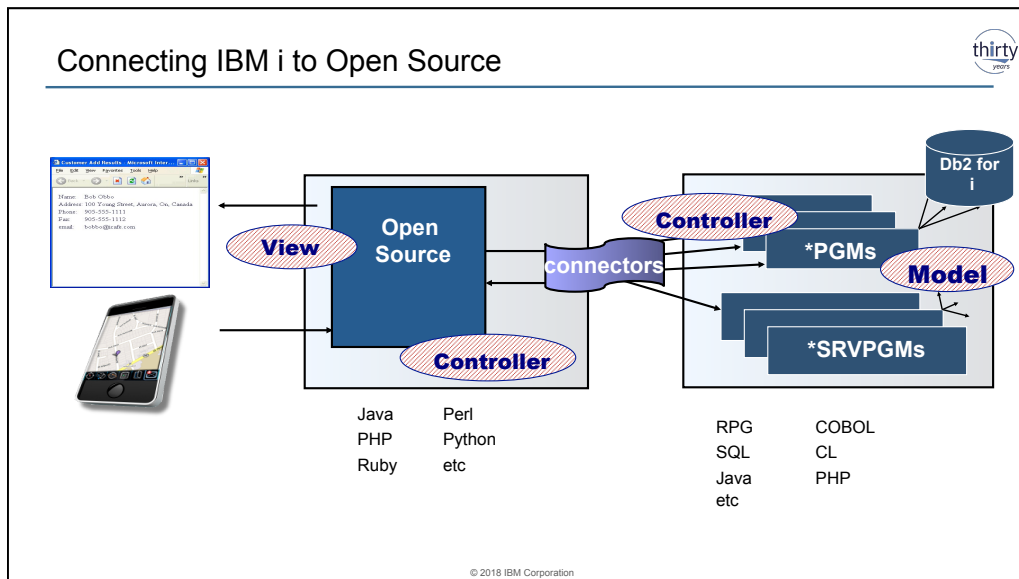

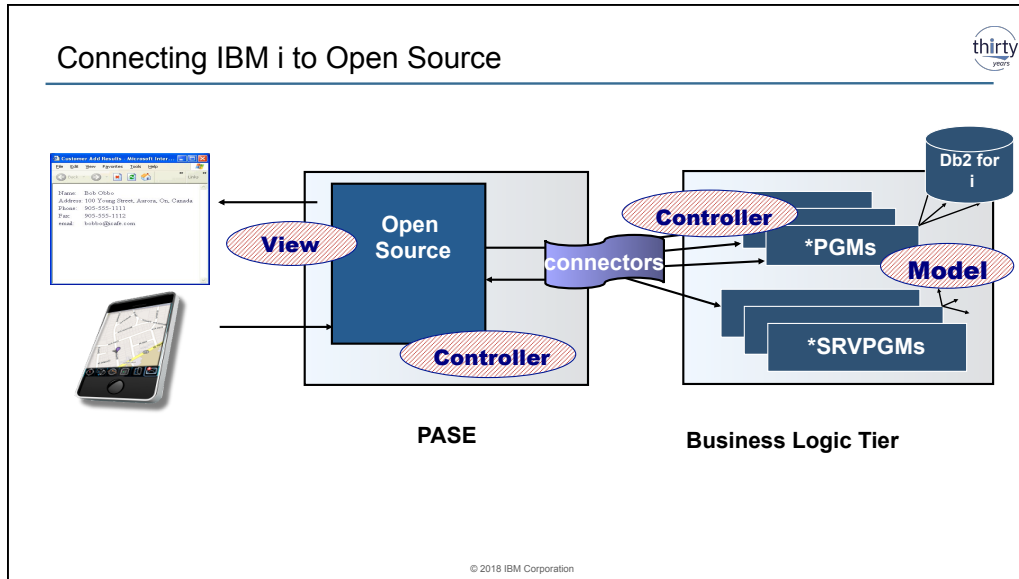

© 2018 IBM Corporation

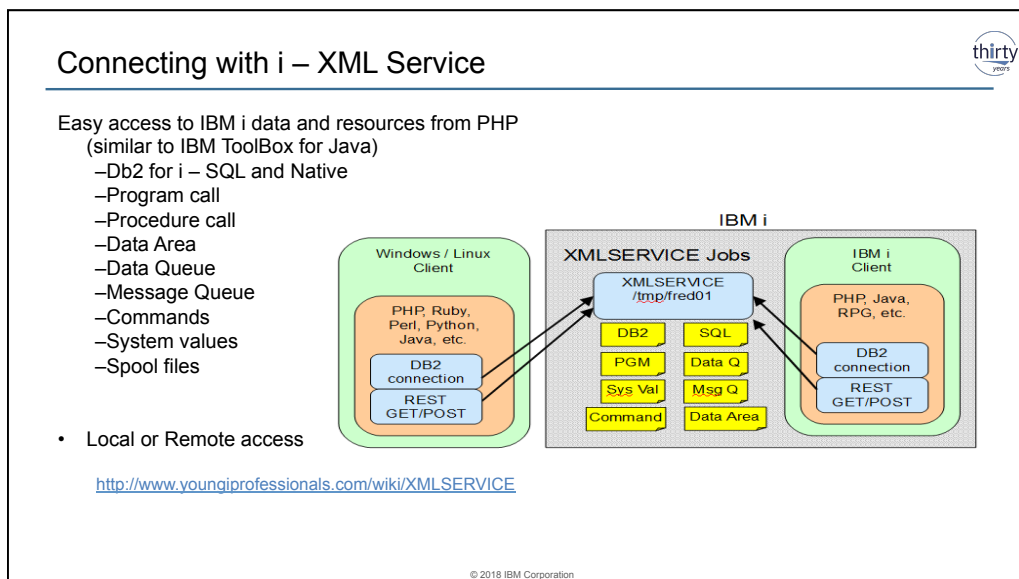

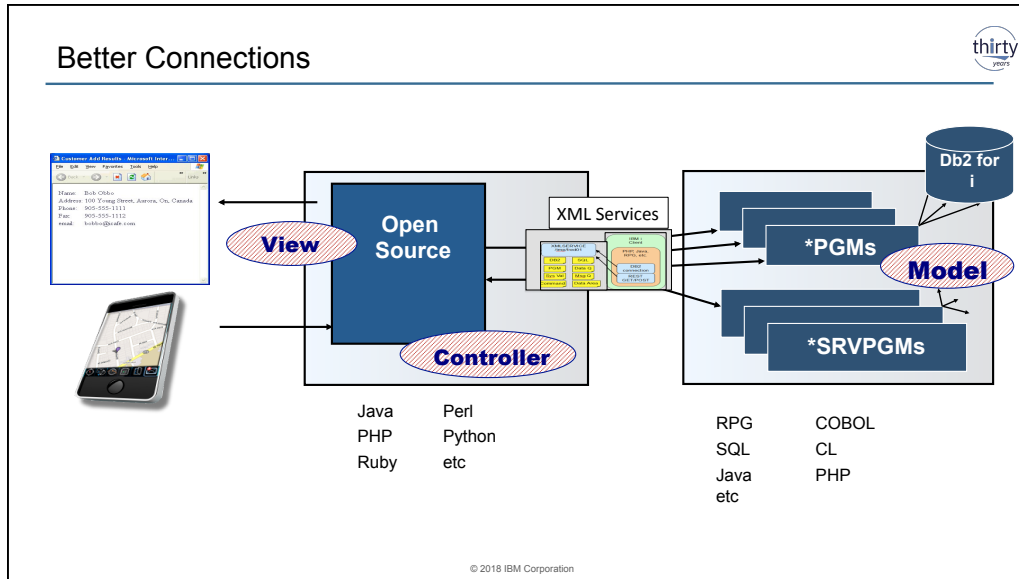

Open Source Strategy

- Open Source Strategy
 - Encourage all vendors to port to IBM i
 - Provide the 'right' components
 - Provide 'support'

© 2018 IBM Corporation

Open Source Solutions for i

- Zend Server for i
 - Preloaded with IBM i 7.1 and 6.1
 - One year of Silver Support from Zend
- Zend Server for i
 - Available from Zend
- Zend Studio for i
 - Eclipse-based development environment
 - One year of Silver support from Zend
- Zend DBi
 - MySQL implementation for IBM i
 - Db2 Storage Engine enables data storage in Db2

Special notices

This document was developed for IBM offerings in the United States as of the date of publication. IBM may not make these offerings available in other countries, and the information is subject to change without notice. Consult your local IBM business contact for information on the IBM offerings available in your area.

Information in this document concerning non-IBM products was obtained from the suppliers of these products or other public sources. Questions on the capabilities of non-IBM products should be addressed to the suppliers of those products.

IBM may have patents or pending patent applications covering subject matter in this document. The furnishing of this document does not give you any license to these patents. Send license inquiries, in writing, to IBM Director of Licensing, IBM Corporation, New Castle Drive, Armonk, NY 10504-1785 USA.

All statements regarding IBM future direction and intent are subject to change or withdrawal without notice, and represent goals and objectives only.

The information contained in this document has not been submitted to any formal IBM test and is provided "AS IS" with no warranties or guarantees either expressed or implied.

All examples cited or described in this document are presented as illustrations of the manner in which some IBM products can be used and the results that may be achieved. Actual environmental costs and performance characteristics will vary depending on individual client configurations and conditions.

IBM Global Financing offerings are provided through IBM Credit Corporation in the United States and other IBM subsidiaries and divisions worldwide to qualified commercial and government clients. Rates are based on a client's credit rating, financing terms, offering type, equipment type and options, and may vary by country. Other restrictions may apply. Rates and offerings are subject to change, extension or withdrawal without notice.

IBM is not responsible for printing errors in this document that result in pricing or information inaccuracies.

All prices shown are IBM's United States suggested list prices and are subject to change without notice; reseller prices may vary.

IBM hardware products are manufactured from new parts, or new and serviceable used parts. Regardless, our warranty terms apply.

Any performance data contained in this document was determined in a controlled environment. Actual results may vary significantly and are dependent on many factors including system hardware configuration and software design and configuration. Some measurements quoted in this document may have been made on development-level systems. There is no guarantee these measurements will be the same on generally-available systems. Some measurements quoted in this document may have been estimated through extrapolation. Users of this document should verify the applicable data for their specific environment.
